

All Access

A newsletter for members and friends of ARNSW, facilitating access to all areas of Amateur Radio.

ARNSW is an affiliate of the WIA.

Issue: 20-05

30 Sep 2020

Editor: Ray - VK2ASE

Editorial

Welcome to this edition of *All Access*. The COVID-19 coronavirus and associated restrictions continue to impact upon all sorts of community activities, including those of ARNSW. Many, if not most, of our regular activities continue to be on hold. So, as we are unable to host gatherings of any significant numbers, attendance at Dural is basically “by invitation”.

Education and training days continue to be on hold.

The regular Monday evening Library work sessions continue as normal.

The activities of the HF Interest Group on Monday evenings also continue as normal.

Trash and Treasure sales continue but in a completely different format. The storeroom is full of goodies and these may be viewed and/or purchased by arrangement. See the article below.

Please listen to the Sunday Broadcasts and watch forthcoming issues of *All Access* for further information. And, please heed government warnings and advice on health matters.

Ray – VK2ASE

Trash and Treasure

Trash and Treasure sales will continue but in a different format. We will not be holding a T & T day as we have become accustomed. Rather, you may peruse the equipment list below, which represents some of the equipment ARNSW has for sale, and make arrangement to view the offering or make an offer. Most can be posted but some is too large or heavy for postage.

Pickup is by arrangement so as to keep the number of visitors to a minimum for Covid-19 safety. We could not accommodate the usual crowds that gather in the show room. Also, to meet Covid-19 tracking requirements, visitors will be asked to complete a self-declaration form and sign the visitors book.

Please email disposals@arnsw.org.au to arrange a site visit or to inquire on any item.

All of the advertised equipment has been tested. Any known faults will be described.

HF Transceivers

1. Yaesu FT101 HF transceiver. Both Receiver and transmitter are working but the power output on the bands above 40m is down (50W on 10m). Electrolytic capacitors have been replaced and the case repainted. Supplied with microphone, power cable and accessory plug. **\$200. Collect only.**
2. Kenwood TS520S HF transceiver in clean condition and fully working. Full power on all bands. Supplied with a desk microphone and power cable. **\$300. Collect only.**
3. Kenwood 2m Transverter TV-502 with cables and packing box. Good condition and working **\$100.**
4. Yaesu FT-7 HF transceiver. Repainted case in grey, one odd knob as it was missing when received. In good working condition with microphone, power cable and manual. **\$125.**
5. Alinco DX-70 HF Transceiver in good condition and fully working. With Alinco desk microphone and power cable. **\$450.**

Antenna Tuners

6. MFJ-949E VersaTuner II 1.8 to 30MHz in very good condition and fully working **\$125.**
7. MFJ-934 Antenna Tuner and Artificial Ground 1.8 to 30MHz in very good condition and fully working **\$125.**
8. Yaesu FC-700 HF antenna tuner. Fully working but the case is a bit pitted. **\$75**

Power Supplies

9. JayTech (Jaycar) MP-3068 3-15V 25A regulated power supply. This seems to be similar to the DSE D3800. In good condition and fully working. **\$100.**
10. DSE D3800 3-15V 25A regulated power supply. In good condition and fully working. **\$100.**
11. DAKAI DC Power Supply Model ALC 3030 3-15V 25A Good condition and working **\$100**
12. Power Tech MP3072 13.8V 5A DC regulated power supply Good condition and working **\$50**

Power / SWR Meters.

13. Bird 43 power meter with 25W 200-500MHz element Good condition and working **\$250.**
14. Bird 43 power meter with 250W 2-30MHz element Good condition and working **\$250.**
15. OskerBlock SWR-200 0-200W HF power and SWR meter with original calibration chart. Good condition and working **\$75.**

HF Receivers

16. AWA C52820 HF receiver. In good condition and refurbished. **\$125 Pickup only.**

Test Equipment

17. Hewlett Packard 8656B 100KHz to 990MHz RF signal generator with AM FM and accurate output level setting. **\$475. Pickup only or Pack and Send.**
18. HP 436A Power meter with 18GH diode measurement head. Good condition and working **\$250.**
19. Lafayette Grid Dip Meter 1.7 to 180 MHz Good condition and working **\$50**
20. Grundig Grid Dip Meter 1.5 to 250 MHz Good condition and working **\$50**
21. AVO 7 analog Multimeter Good condition, with genuine test leads and working **\$50**
22. AVO 8 analog Multimeter Good condition with genuine test leads and working **\$50.**
23. Variac 0-260V 2.5A IEC C13 inlet and GPO outlet \$100.
24. Weinschel Attenuator Model 26-30-33330dB 50W good to at least 2GHz N connectors **\$50.**
25. Narda 786-20 20W DC to 4GHz 20db attenuator N connectors **\$40.**

HF Group Update

The HF Interest Group continue to operate on Monday evenings. If you have an interest in HF or just want to have a look at what's involved call in any Monday evening (except Public Holidays) and introduce yourself. And, you don't necessarily need to be licenced at this stage. Just have an interest.

The group use the call VK2AWI. When I dropped by last week they were actively contacting stations from diverse locations via the digital protocol, FT-8.

You can contact the group via email at "hfgroup@arnsw.org.au".
